

# CHG 3512 Multiple Battery Charger

12 Unit Charger. For use with Williams Sound's PPA R35 and PPA R35-8 FM Receivers.

## Instructions for Use and Care

**WARNING: DO NOT ATTEMPT TO CHARGE NON-RECHARGEABLE BATTERIES!**  
Non-rechargeable batteries, such as alkaline and carbon zinc, may heat up and burst, causing possible injury and damage to the equipment.

Before inserting the PPA R35 or PPA R35-8 receiver into the charger, be sure that each receiver has NiMH batteries installed. Also, check to make sure the switch setting in the PPA R35 or PPA R35-8 battery compartment indicates the "NiMH" setting.

- 1.) Plug the TFP 035 power supply into the AC wall outlet. Plug the power connector into the rear of the CHG 3512 unit (Figure B).
- 2.) Insert the PPA R35 or PPA R35-8 receiver into the charging slot as illustrated in Figure A above. The receiver(s) must be placed in the charger facing forward to make contact with charger contacts. A red LED indicator will illuminate when charging has started (Figure A). The red LED will blink when the receiver batteries are fully charged (indicates the charger is in trickle charge mode).
  - You may charge up to 12 receiver units per CHG 3512 charger.
  - It will take approximately 4 hours to fully charge the batteries.

Note: It is safe to leave the receivers in the charger, even after the batteries are fully charged. The charger will switch to trickle charge to maintain full battery potential.

## Troubleshooting

---

If no LED's light up:

1. Check that the power supply is plugged into the AC outlet.
2. Check that the Alkaline/NiMH battery switch in the battery compartment is set to NiMH.
3. Be sure the receiver is facing forward in the charger (see Figure A).
